CANCER
RESEARCH

Unil
UNIL | Université de Lausanne

Confirmed international speakers (alumni):

Rhodri Ceredig (Galway, Ireland)

Ralph Budd (Vermont, USA)

Paolo Dellabona (Milano, Italy)

Ken Shortman (Melbourne, Australia)

Toshiaki Ohteki (Tokyo, Japan)

Carlos Ardavin (Madrid, Spain)

Toufic Renno (Lyon, France)

Joost van Meerwijk (Toulouse, France)

Gerard Eberl (Paris, France)

Marcin Mycko (Lodz, Poland)

Thymocyte progenitors

Susceptibility to lupus autoimmune disease

Tumor immunosurveillance by lipid-specific T cells

Enhancing antibody responses by targeting dendritic cells

NKT cells, antigen-presenting cells and beyond

Innate immunity to infection and allergy

Immunogenic erk function in cancer

Thymus-derived regulatory T cells

Regulation of Immunity by bacterial symbionts

Noncoding RNA regulation in multiple sclerosis

Organizing committee: Anne Wilson, Pedro Romero and Sanjiv Luther (contact: anne.wilson@unil.ch)
