UNIL | Université de Lausanne
Faculté de droit,
des sciences criminelles
et d'administration publique

The 5th meeting between Science and Law in the Digital World will take stock of the impact of new technologies in the justice and health sectors.

The speakers will provide a fresh perspective on digitalisation in the justice sector and discuss the use of AI in dispute resolution and the consequences of the emergence of the metaverse. The focus will be on recent developments in Switzerland and Europe and include updates on the project Justitia 4.0.

The afternoon will be dedicated to current developments in the health sector. While digitalisation holds great promise it also poses enormous challenges for healthcare systems. Speakers will focus on data protection in healthcare, update participants on the progress of digitalisation in the sector and discuss pressing questions, including ethical considerations.

Inscription obligatoire en ligne

University of Lausanne

Synathlon Building, 9h30 - 15h00
