# Social resilience in the Sundarbans

## ENGAGE4Sundarbans

*UNIL, IIT Kharagpur, ULAB, SAJIDA, SJSM*

A transdisciplinary  
research-action  
project  
supported by  
SDC and the SNSF  
through the  
SOR4D program.

The inhabitants of the Ganges-Brahmaputra River Delta in India and Bangladesh are highly exposed to multi-hazards, such as storm surge, cyclones and salinisation, while being socio-economically marginalised. The seminar will reflect on the solutions co-developped by the communities of the River Delta with the support from our Transdisciplinary team.
